ENGINEERED FOR THE WORLD'S HARSHEST CLIMATES

## ENJOY THE LUXURY OF YOUR IN THE

HEAL YOUR BODY, SLEEP BETTER, MELT STRESS

# OWN PERSONAL SPA COMFORT OF YOUR OWN HOME.

AWAY, AND MAKE TIME WITH FAMILY AMAZING.

### **Pain Relief**

The buoyancy provided by water offers a great relief to those who suffer from chronic or injury-related skeletal discomfort. Chronic back pain can be relieved by removing the full load of gravity from the spinal column while immersed in warm water and increases activation of "feel good" neurotransmitters. This effect can be magnified by the massaging action of water jets and by ergonomic seating.

### **Natural Detoxification**

Let's face it – hot tubs are hot. As our bodies attempt to maintain a steady internal temperature, our natural coolant, perspiration, flushes out many of the toxins and other undesirable compounds that we accumulate. In the face of an increasingly sedentary lifestyle, natural detoxification is at a premium.

### Relaxation

Science aside, the most important benefit of time in a hot tub is the state of relaxation that's a part of every soak. In a world that heaps stress on us all, an Arctic Spa hot tub is a respite from the storm. We can recharge our mental batteries, and emerge from the water rejuvenated.

### FAMILY FRIENDS & FUN

### Your new hub of family fun.

There is no better place to spend leisure time with friends and family than in an Arctic Spa. Laughing, chatting, listening, and sharing - these were the family interactions that once were a daily ritual of the family dinner table. Today, we are pulled in so many different directions; we are asked for more time at work, at school, even at play. Your Arctic Spa can be your new meeting place - reconnect with your kids, your spouse and yourself.

From our earliest memories, we are drawn to water - kids and water are a natural combination! Add warmth and water movement and hot tubbing becomes the stuff of lifetime memories. Our beautiful LED lighting and water features will give those curious and playful minds a healthy outlet, and will build an appreciation for taking time for relaxation. As a matter of fact, time in the hot tub brings out the kid in us all, and who couldn't do with a little more fun? Smiles and laughter are standard features on every Arctic Spa.

# ARCTIC SPAS® -- MILESTONES

### MANY OF THESE FEATURES AND MILESTONES ARE

### 1994

First heat recovery system in an acrylic spa.

First spa with a fully supporting and enclosed base.

**Reflex Torsion Hose**<sup>™</sup> First spa to use external sleeve flexible hose.

### 1998

First spa to use an "out of water" heater element.

First ozone system to incorporate static mixing and off-gas destruct.

### 2005

First spa to offer high density SMC- Moulded floor.

First to meet Ipx5 standards on all jet pumps.

### 2006

First spa depth filter. **Mylovac**® First metalized barrier, vacuum -sealed cover.

### 2007

Heatlock<sup>®</sup> First integrated spa insulation system.

Imagine – It<sup>™</sup> First custom graphic cabinets.

2008

Onzen™ First proprietary and integrated salt & ozone water treatment system.

Web Connect First internet connected & controlled hot tub.

### 2014

**Electrical Consumption** Monitoring First Built In Real Time.

Spa Boy First internet connected automatic pH and sanitizer measurement and control.

### 2016

myarcticspa.com Web Portal First ever live-monitoring of spa operating conditions, including automated water care parameters, viewable from any web-connected device.

# ARCTIC SPAS® IS ON A MISSION, FOR YOU

We believe that the better you feel, the less you have to do, and the easier it is to own an Arctic Spa, the happier you will be.

We are continually developing and introducing new features with this mission in mind.

### SHOWCASED HERE:

### 2001

Forever Floor® First built-in weatherproof spa foundation.

### 2002 First spa to incorporate

LED multi-colour lighting. Legend Series First 3 jet pump spa.

Castcore<sup>®</sup> First cover insert formed in mould.

First rotary-axis jets.

### 2004

Arctic Chiller™ First solid state water cooling system.

. . . . . . . . . . . . . . . . . . .

Sonic Massage<sup>™</sup> First vibro- acoustic massage in spas.

2012

Introduced the first allweather pool in the industry.

### 2009

**Ultimate Lighting** First externally mounted LED jet lighting with looped power supply.

### 2010

Pulse™jets First Titanium jet spinning mechanism.

### 2011

Built first spa that can be controlled from a phone with a smartphone app.

First off-peak energy use programming introduced.

2017

WORKS WITH alexa

Al Integration First voice controlled hot tub using Amazon Alexa<sup>™</sup>.

# PROUDLY MANUFACTURED IN CANADA Sold worldwide

### Hand Built meets High Tech

A visit to any of our production facilities will showcase the best of both worlds.Precision cutting water-jet robots work methodically in our shell construction area while craftsmen hand-assemble our beautiful western red cedar cabinets. These components are combined in a blend of technology and touch, making the Arctic Spa truly unique -possibly even the most prized possession in your backyard!

### Certified Manufacturer, Industry Leader.

Arctic Spas<sup>®</sup> is an original member in good standing as a certified Hottubstar certified manufacturer. As Canada's largest hot tub company Arctic Spas<sup>®</sup> is committed to being a leader in pursuing tougher energy use legislation, and will continue to drive the agenda of manufacturing responsible, safe and efficient products, and honesty in advertising.

#### European Certificate Z1.17.08.56165.057

#### North American Certificate U8 17.05.56165.056

As an international hot tub manufacturer, we are required by law to meet certain quality and safety standards. We choose to get our certification from TÜV, one of the most strict and respected manufacturing certification organizations in the world. Beware if your hot tub is not certified by a respected agency to meet UL 1563 (USA), CSA C22.2 #218 (Canada), and IEC 60335-1/IEC 60335-2-60 (Europe).

# ENVIRONMENTALLY SOUND ENERGY EFFICIENT

### WE SHARE THIS PLANET

Leaving a smaller environmental impact is not a destination but an ongoing journey, and Arctic Spas® is committed to constantly making steps that further this cause. At the heart of our strategy is the reduced environmental impact of each of our hot tubs as it operates year after year in your backyard. By using less electrical energy everyday, in every backyard, we strive to provide not only a reduced environmental footprint, but an economic benefit for our customers.

Some other green initiatives we are involved with:

- Not only has Arctic Spas® met all current efficiency legislations across the globe, but we have taken a leadership role, and have lobbied for more rigorous regulation and legislation of energy efficient requirements for the future. By raising the bar we are challenging our own organization and our industry to spend the time and resources to make efficiency a priority.
- Creatively looking at new ways to insulate better. Insulation is a key component in operating efficiency, particularly in cold weather climates. Our FreeHeat<sup>®</sup> Insulation system is the platform that we will evolve and refine and we will continue to progressively develop our spa cover systems as well.

- We are constantly looking to improve water quality through technology, thereby reducing the amount of chemical that must be added to spa water to keep it safe and clean. Our 1 micron filtration systems physically remove many of the contaminants that other technology leaves behind to be chemically treated, and our continued development of the Onzen<sup>™</sup> and Spa Boy salt water system will drastically reduce the amount of sanitizing product that is required over the lifetime of our spas.
- We have partnered with PEFC for the ethical and responsible management of the forest areas that produce wood product for our spas. Through this partnership we are working to provide beautiful and functional cedar cabinets from highly sustainable sources.
- We are working internally to reduce paper products in our operations. Through a variety of technologies we have moved to electronic systems to replace paper systems. Our customer service and technician training sessions for example, are primarily delivered online - this has reduced not only the paper required for training manuals, etc. but the carbon footprint of airline flights for these training sessions.

Paper products that we are still using are sourced from FSC-compliant sources wherever possible, and all our facilities use recycling extensively. Our production facilities have on-going quantifiable programs in place to promote and evaluate the reductions in construction material waste that we are able to achieve - there is always more we can do.

Arctic Spas® is invested in the communities where we maintain facilities. Our World Headquarters in Thorsby, Alberta, Canada is the primary employer in the area, and we contribute to programs that foster healthy, active, and environmentally sound lifestyles within this community. Our operations in Washington State, USA strive to do the same, participating in many events, festivals and programs that put the environment first. We hope that as you strive to make better choices for our planet, you support our efforts through your purchase. Thank you.

### ARCTIC SPAS® CUSTOMIZATION WITH ENDLESS OPTIONS, WE'LL BUILD YOUR SPA YOUR WAY.

With most manufacturers, you are often sold a spa with very little choice – as is, take it or leave it, and often it's the spa that's best for the dealer, not for you. At Arctic Spas®, you choose what's best for you!

With good advice from your local authorized Arctic Spa dealer, you never have to buy more than what you want, and never have to settle for less. From a basic, low maintenance tub to the cutting edge Epic Series, Arctic Spas® is all about choice.

### with over 2.4 MILLION combinations

....

including mould design, jetting configurations, purification, filtration and endless options such as our LED lighting systems and audio systems, we take your specs, your needs, your wants – all your choices, and build your perfect spa.

Where comfort and versatility meet value, you will find the Baffin from Arctic Spas. Highlighted by the distinctive and roomy lounger, and balanced by two well-appointed therapy seats, the Baffin hits all the right notes. With most jets concentrated in these three main seating areas, the Baffin delivers the maximum amount of therapy where it is needed day-to-day, yet still retains additional space for unexpected guests!

# THE ORIGINAL ALL WEATHER POOLS

BY ARCTIC SPAS®

Our all weather pools bridge the gap between hot tub and pool. Enjoy the benefits of a pool at home, all year, in any weather, with the efficiency and low maintenance that comes with an Arctic Spa hot tub.

## SWIM, HOT TUB & ENTERTAIN ALL YEAR.

Swim all year, hot tub all year, entertain the kids all year, and save A LOT of money compared to buying a traditional swimming pool. And on top of all that, it is easy to install; no digging, no contractors, no special equipment. It simply cranes into place and its ready to fill with water. The core design is virtually identical to our world famous hot tubs, which delivers extreme energy efficiency, low maintenance, and advanced control technology. Work out, relax, or splash around: these pools are perfect for large groups or a solitary soak.

#### FANTASTIC LIGHTING + SWIMMING

Arctic Spas is known for two things - making the best cold weather spas on the planet, and having a good time wherever we are. When we travel to a tropic location, a must-have is a swim up bar! Even better, leave the hassles of travel behind, and enjoy our newest All Weather Pool, the Okanagan. Fittingly named for Canada's summer playground, the Okanagan comes complete with an LED-lit swim up bar and even an ice bucket to keep the drinks cold when the heat is on! With optional seating for a dozen or more, fantastic lighting throughout, water features and a choice of swim jets to play in, this All Weather Pool can really do it all.

#### OUR MOST SPACIOUS POOL

ALL WEATHER POOLS

The Athabascan is the purest representation of the All Weather Pool. With the largest open water area in the All Weather Pool range, the Athabascan provides the maximum amount of room for relaxation and fun. Movement in and out of the pool is facilitated by the simple moulded steps, and a slightly elevated area at the front of the tub gives little ones a break from deep-water activities. The Athabascan is the family backyard pool that is available year round - always the perfect temperature and just steps from your home.

# **OUR VERY BEST** THE EPIC SERIES

THE MOST POWERFUL ARCTIC SPAS EVER BUILT. FIVE DEDICATED PUMPS WORLD LEADING THERAPY IN OUR PURSUIT OF THE MOST THERAPEUTIC SPAS EVER CONSTRUCTED, WE HAVE COMBINED NEW AND PROVEN TECHNOLOGY TO CREATE A MASTERPIECE -THE EPIC SERIES.

Each designated seating area in the Epic Series spas is powered by its own dedicated pump, which has the capability of producing huge flow rates. Flow rate is nothing without low restriction plumbing and great jets, and the Epic has both. Water is delivered to over 60 of our patented bearing-less rotating Therapy jets via our exclusive oversized Reflex Torsion<sup>™</sup> hose and sweep rigid fittings. The resulting oscillating massage is without comparison, and will offer the widest range of therapy options to the discerning owner.

Individualized therapy areas are controlled from the digital topside control, or with the Arctic Spas® Smart Phone App. Of course, each jet can be individually adjusted for flow rate, and the supplementary venturi air component can be tuned as well. The result is the most personalized massage you have ever experienced.

THE EPIC SUMMIT XL

THE EPIC KODIAK

THE EPIC TUNDRA

THE EPIC Klondiker

### SELF-SUPPORTING COMPOSITE HULL

#### GUARANTEED TO LAST A LIFETIME

The shell of an Arctic spa is undoubtedly the core of our design, and as such, is uniquely designed to handle this function.

We begin by vac-forming sheets of premium Aristech® Cast Acrylic, transferring thousands of hours of mould design and engineering into a tactile form. Now unmistakably an Arctic spa, we hand apply layer after layer of a proprietary filler-free fiberglass composite material to give this form its legendary strength. We apply more fiberglass than anyone else in the business - and no cost-saving shortcuts are taken; no plastic backing, no props or supports, and no foam is ever applied to our shell. After numerous procedures to check strength and alignment criteria, shells head to our state of the art water-jet robotic and CNC cutting stations for trimming. The result is a perfect blend of strength and accuracy - and the backbone for the application of cutting edge technology that is signature Arctic Spas®. We are so confident in the strength of our hot tub shell that we offer a lifetime warranty on the shell structure. Please see our Warranty Document for more details.

> IS IT MORE COSTLY AND LABOUR INTENSIVE TO BUILD A SHELL THIS WAY?...ABSOLUTELY

BUT WE BELIEVE IT TO BE THE BEST WAY, AND THAT HAS ALWAYS BEEN OUR PURSUIT.

# FREEHEAT® INSULATION SYSTEM

# INSULATION IN THE RIGHT PLACE SAVES YOU MONEY, EVERY DAY!

The investment in constructing a self-supporting shell allows Arctic Spas® to insulate differently than everyone else. For our design inspiration, we didn't have to look far, our homes in northern Canada provided us all we needed.

We insulate the exterior walls, the floors and most importantly the attics of our homes and we tuck everything important to us within this insulated envelope. Ambient heat from the pump penetrates the spa shell and heats the water. In winter this heat returns to the pump area in the event of a power loss.

We have always believed that insulation below the water surface is of small value if the areas above and directly to the sides of the water are not adequately insulated (seriously, doesn't heat rise?). The "attic" of our design is our Mylovac cover, which at 5" of thickness and featuring a full-length baffle is capable of retaining even more of your energy dollars. Next, high density polyurethane foam is applied to the cabinet walls and lip underside to a thickness that stops heat loss.

We finish off this insulation envelope with the same foam applied into our floor systems. Then, we place all our equipment inside this cocoon, creating a perfect, stable operating environment.

#### **More Innovation**

ANY BARRIER BETWEEN THE EQUIPMENT AND THE SHELL WILL PREVENT HEAT TRANSFER AND COST YOU MONEY.

We have taken our insulation to the next level. Already the best insulated cabinet in the world, our FreeHeat® Insulation system did not escape the exacting eye of our engineers. Our overlap door insulation design removes the last opportunity for heat loss and captures even more residual equipment heat. To monitor this increased capacity for trapping waste heat, we have enabled our spa packs to take in internal cabinet temperature data and to activate the innovative RossExhaust<sup>™</sup> system to balance the cabinet temperature when required. The ability to balance and manage the cabinet air temperature is such a unique and valuable feature that we have secured a patent on this system. No other hot tub in the world has FreeHeat.

#### Lowest Running Costs

What does this mean for the spa owner though? Residual heat from our equipment, primarily our High Flow Energy Efficient motors, is allowed to penetrate through the fiberglass shell. This maintains spa water temperature and eliminates many of the heater cycles that other designs, particularly foam-filled insulated designs have to run. Fewer heater cycles mean a lower power bill each and every month.

#### **True Freeze Protection**

One last benefit of the FreeHeat® design that we hope you never need is the ability of the spa water's heat to keep the cabinet from freezing in a power outage situation. Without any insulation between the water and the cabinet, heat energy transfer can work in both directions. In our testing, and from anecdotal evidence, you have about 7 days, at -20°C before freezing occurs within the cabinet and adding an alternate heat source (space heater, trouble light) can prolong this grace period indefinitely. Other brands can start to freeze within a few hours in these conditions. Nice to have some margin for error, isn't it?

# WESTERN CANADIAN RED CEDAR CABINETS

#### NATURE'S PERFECT BUILDING MATERIAL

Beauty, strength and accessibility are built into every Arctic Spas® cabinet. We construct each cabinet using kiln-dried, clear, furniture-grade Western Red cedar. This product is uniquely suited for our purpose, it has remarkable ability to thrive in a wide range of temperatures, humidities, and a high resistance to pests. In our design the corners are rounded with tongueand-groove vertical cedar dadoed into top and bottom 2 x 4 rails. The sturdiness of our cabinets is incomparable. No sagging, shifting or misalignment will occur. All come with up to eight inset access doors, two on each side, allowing easy service and upgrades to any part of the spa. To finish the cabinet, three coats of a special, protective wood treatment is applied.

BEING ABLE TO GET TO ALL SPA COMPONENTS IN THE FUTURE JUST MAKES SENSE.

All Arctic Spas® come standard with insulated removable access panels on all sides of the cabinet. Many companies bury hundreds of potential problems completely in foam, effectively ensuring that service is a nightmare when this foam needs to be removed and replaced to perform any service. With an Arctic spa, it's simple. Remove a panel, perform the repair and replace the panel. We're simply being realists when we tell you that some fitting will leak during the life of the spa and we provide an easy and efficient way to deal with the inevitability. Total Access also gives you the ability to upgrade your spa in the future. As we develop technologies or as your needs change, your Arctic Spa can easily be upgraded. There is no need to trade in your spa every few years when we can simply add jets, pumps, lights, music, purification or any other features in the future. Having to trade your spa in every few years to keep up with technology will get very expensive.

# WATER CARE SPARKLING CLEAN WATER.

#### SPARKLING CLEAN WATER, WITH MINIMUM EFFORT AND THE WIDEST CHOICE OF USER-CUSTOMIZABLE OPTIONS.

As Arctic Spas® continues to refine our patented filtration systems and develop new ideas, our goal has always been to keep your spa water safe and clean, and to do so with the least amount of work for the spa owner as possible. Because of such vast differences in usage (bather load), source water quality, and other parameters, we realized that we needed to give the spa owner more choice. With some good advice from an authorized Arctic Spas® dealer, you now have many custom filtration and technology options.

#### **Active Skim Filtration**

Each Arctic Spa filter chamber houses our Active Skim Filtration mechanism, which constantly adjusts to the changing water level in your tub thus maintaining powerful surface skimming. With Active Skim Filtration, contaminants at the surface are drawn down into the filter regardless of water level, unlike typical systems. Additionally, the mechanism traps larger particles in an integrated basket, and does not allow them to be re-released back into the bather pool.

#### More Control = Cleaner Water

Filtration cycles and circulation pumps are now living in harmony. All Arctic Spas® come standard with an adjustable filter cycle system using low speed on pump 1 to do the filtering. This system is now programmable from 1 to 24 hours of run time. With the addition of the Peak II System (optional), you can have a 24 hr. filtration pump system as well, which is also programmable in 1-24 hr. increments.

#### Silver Sentinel 1 Micron Filters

These depth filters trap particles within the filter media (up to 900 sq. ft in each filter) and offer the additional benefit of embedded nano silver internal coating. At an amazing 1 Micron level of particle trapping, Silver Sentinel filters offer the highest level of filtration, and are disposable and recyclable. All Silver Sentinel Filters eliminate the need for many auxiliary de-foaming, clarifiers, filter cleaners and coagulating chemicals.

#### **Compact Pleated Filter**

This combination option provides the fine filtration of the Compact Pleated Filter technology with the versatility of a reusable bag filter. The microfiber bag filter can handle sporadic high-use or high-debris periods without requiring frequent replacement of the Pleated filter portion of the system.

# e hout

#### **Microfiber Filters**

These simple but effective filters can be used to quickly clean up your spa water after periods of high use, or low maintenance. They can be rinsed and re-used, and are very affordable. Great to have a few on hand, ready to have your tub sparkling for a weekend of entertaining!

\*Dual filter chambers not available on the Arctic Fox or Essential Series.

## HIGH FLOW ENERGY EFFICIENT MOTORS

BETTER ENGINEERING ALWAYS RESULTS IN BETTER PERFORMANCE.

We source our motors to achieve optimal standards on two fronts: energy efficiency and water flow. As a result, Arctic Spas uses motors that provide the same intensity of water flow and jet performance without the excessive energy usage of higher horsepower competitors. We're particularly proud of the fact that Arctic Spas motors are extremely low consumers of energy at both low and high speeds, and we assure the long-lasting quality of our motors by prioritizing energy efficiency and high performance over horsepower. A commitment to clever engineering led us to use silicon carbide seals in our motors. They have less parts than other comparable seals, which limits failure potential. Arctic Spas motors represent our constant quest to make sound, exceptional, and user-friendly products. They're of the highest quality and efficiency, and are just another step we've made towards creating more reliable spas.

# COMFORT & THERAPY

We believe that everyone deserves comfort so you will see luxurious individualized seating in many of our mould designs. Our seats have been meticulously designed to wrap and support a wide range of body dimensions, with multi-level armrests and adjustable headrests in all the right spots. In most of our designs, we provide gender specific and individualized seating, with consideration given to torso length, seat width and jet placement.

Within these sculpted seats, we have taken great effort to position our jetting packages to provide the best massage possible. We call it the Dedicated Zone Therapy jetting profile. Within this system, select seats have a dedicated therapy function including neck and upper back stations designed to provide stress relief for these common tension trigger points, and lower back stations to target the muscles that support the lower back region. The jetting flow in these stations is tuned to match the size of the muscle groups within that area; large muscle groups get more pressure.

Other seats that target more superficial muscles spread out the jet pressure for a gentler massage. And, you will also see seats with no jets at all because at times, a relaxing soak without jets is just what we need.

We believe there is much more than jet count and horsepower rating to a great massage and a great hot tub experience. Our R&D team works diligently to use the high flow rate that is achieved by our High Flow Energy Efficient motors in the most efficient manner possible. We tune the pump wet ends, oversized Reflex Torsion hose and use sweep-Y fittings to maintain the desired pressure within the plumbing systems, and use a lot of high volume 5" Pulse jets. More water volume, with a vast range of user-adjustable flow rates, through great jets equates to a great massage.

#### FINALLY A PILLOW THAT WORKS.

After years of issues dealing with poorly placed, deteriorating pillows, we believe we've finally come up with the ultimate pillow design. Our new telescoping design adjusts to perfectly fit varying heights of bathers. The pivoting mechanism also cradles the neck to maximize the comfort. The pillows are still removable for cleaning but will never be found floating around the spa. Finally, we've changed the product the pillows are made from. Most pillows are made from a polyurethane foam. These pillows absorb water and can deteriorate quite quickly in a hot tub environment. Our new pillow is made of a rubber like material called EVA. This material (used for CROC<sup>™</sup> shoes) unlike PU foam, does not absorb water or deteriorate rapidly.

#### **Amazing Therapy Jets**

GREAT JETS GIVE GREAT THERAPY.

Arctic Spas® patented rotating, bearing-less Pulse<sup>™</sup> jets provide a range of massage from light and refined to deep and invigorating. As the nozzle smoothly rotates on a titanium shaft, water oscillates in a pattern that never stings. Our jets thread in and out, so that removal is never a hassle, but still retain an adjustable face to vary the pressure as required. With no ball bearings to ever seize and fail, your personal masseuse never takes a day off.

Unlike most other manufacturers, our hot tubs use only rotating jets\* – no stationary or "directional" jets are substituted to cut costs.

#### Lasting Scents<sup>™</sup> Aromatherapy

#### SOOTH YOUR BODY, MIND & SOUL.

The power of scent to positively change your state of mind is a widely accepted and utilized natural therapy, and a perfect enhancement to a therapeutic soak. Each Arctic spa incorporates our Lasting Scents<sup>™</sup> inline aromatherapy system that introduces fragranced air directly into the spa. Our unique aromatherapy canisters release fragrance when opened and can be turned off when not in use. The combination of scent stimulation and hydrotherapy is powerful and soothing for both body and spirit.

\*Our independently controlled above water neck jet nozzles and our Monsoon jets are directional only, by design.

ENGINEERED FOR YOUR OWN LIFESTYLE

# -- (So) FOREVER FLOOR® THE PAD'S BUILT IN

#### ALL YOU NEED IS LEVEL GROUND.

Already renowned for our sturdy insulated platform wood floor, standard on every Arctic spa, our engineers decided to raise the bar yet again by developing the Forever Floor<sup>®</sup>. Composed of SMC fiberglass composites, this floor is impervious to moisture, pests, and time. It completely eliminates the need for foundation materials like concrete, decking, or blocks!

Just set it on firm, level ground, hook it up, fill and use. Installation has never been easier and your floor will last forever in any conditions. In addition, your portable spa is now truly portable. If you move spa locations in your yard or if you move across town, the foundation comes with you. Be sure to order a Forever Floor® on your new Arctic Spa.

# MYLOVA C<sup>TM</sup> the world's finest cover

LONGEST LASTING COVER. PERIOD.

To top it all off, we offer an optional upgraded cover that is unlike any other in the industry. The Mylovac<sup>™</sup> cover starts with foam twice as dense as the industry average. We also insert a metal "C" channel into the foam centers. This creates a cover capable of supporting thousands of pounds of weight. Never worry about snow loads or kid loads again. We then wrap these inserts in a metal/poly bag (similar to a coffee bag). This bag is then vacuumed and heat sealed. This technology is the only system that is capable of completely keeping moisture off of your cover inserts. Wet and heavy covers result in constantly increasing running costs as well as regular cover replacement.

Longer wind flaps, locking straps, carry handles, and an insulating baffle along the entire seam, finish off the best cover in the industry. This cover will save you thousands over the life of owning your spa.

# Power Consumption

**OnSpa®** was introduced way back in 2011 and keeps getting better and more advanced every day. This advanced control system originally enabled full control of your Arctic Spa with your smart phone. It has evolved to be much more and continues to have new features added on a regular basis.

# Onspa<sup>®</sup> is a control system that enables 2-way internet communication and control.

OnSpa® allows you to monitor and control your hot tub from anywhere in the world using the Arctic Spa App on your phone or via the **myarcticspa.com** web portal.

OnSpa® allows our technicians to monitor and access your hot tub in real time, from anywhere in the world, anytime.

40.0°

1 111

The core component of this must-have option is the EcoPack. This is the on board Arctic Spa computer. Pair the EcoPack with your home internet connection and OnSpa becomes activated and all of the benefits are yours. Choose from a Wi-Fi connection from your hot tub to your home network, traditional Ethernet cable, or Ethernet-Over-Power connection via the existing power line. There are several ways to connect, but only one OnSpa®, and its only available on Arctic Spas.

**OnSpa®** also allows a steady stream of data from thousands of Arctic Spas around the world to be collected and analyzed on an ongoing basis. This data is used to make improvements in energy efficiency, performance, and reliability. It also allows us to detect malfunctions and issues that need attention before you even notice. Often, our technicians will detect and then remotely fix an issue before you even know about it. In cases where a technician needs to fix an issue on site, we can detect the problem and contact you to make a service appointment even before you are aware anything is wrong.

OnSpa® is allowing us to deliver a whole new level of customer service that the hot tub industry has never seen before.

# (S) SPA BOY<sup>™</sup> AUTOMATED SALT WATER CARE

BOOST

# CUTTING EDGE EXCLUSIVE TO ARCTIC SPAS®

Our automated water care system, Spa Boy represents the most important advancement to hot tubs in many years. Rather than solely relying on inconvenient and imprecise manual testing and addition of sanitizer to your spa, Spa Boy monitors, and automatically helps maintains ideal spa water conditions. Spa Boy simply, accurately and effortlessly helps to maintain perfect clear and safe spa water for you. This incredible technology uses medical-grade sensors to constantly analyze key water cleanliness parameters and from this data, the Spa Boy system precisely controls the output of our integrated salt water system, ensuring that sanitizer levels are kept in the absolute optimum range. Should your spa's pH value come slightly out of balance, Spa Boy alerts the spa owner (via the topside control panel, the app and the myarcticspa.com portal) to correct this condition.

Spa Boy, quite simply is game-changing - removing the only real downside left remaining to hot tubbing! So relax, enjoy your Arctic Spa to its fullest potential, and leave water maintenance to your own, personal Spa Boy!

A **medical grade sensor** measures ORP and pH for water quality. The **SpaBoy controller** analyzes the data and activates the **electrolytic cell** when the water quality drops below the set point. The **EcoPack** control system integrates SpaBoy with the main hot tub controls and enables 2 way communication with the Arctic Spas App or myarcticspa.com via the internet.

# () WATER CARE

### **PEAK OZONE I** Reliable and highly effective ozone integration.

Peak I consists of the addition of Arctic Spas® Peak Ozone system within the internal plumbing of the spa. During filtration, water moves through an area where it is exposed to activated oxygen, or ozone, which provides remarkable oxidation. Highly concentrated ozone is created within our twin Failsafe<sup>™</sup> generators, and then is injected into the water. The mixture of water and ozone is suspended in the turbulent Optical Vertical mixing chamber to significantly increase the contact time of ozone with water. This process results in many of the organic compounds being oxidized, leaving less work for the sanitizing products to do.

### **PEAK OZONE II** EXTREME OZONE INTEGRATION

The Peak II system offers all the same benefits of the Peak I system but with a few additional features. We've added a circulation pump to the system for more efficient production and control of ozone production from 1-24 hours. We've also doubled the volume of the mixing chamber. Better mixing and longer contact time is guaranteed to improve results. Peak II also adds a secondary filtration system allowing 1-24 adjustments of filtration and ozonation. The circulation pump enables two functions - to provide passive filtration up to 24 hour per day, and to allow the flexibility of changing the run time of the circulation pump. Changing the run time allows the user to precisely manage power consumption to match local grid rates, or usage patterns.

# ONZEN<sup>TM</sup> SALT WATER SYSTEM

The Onzen Salt Water system is Arctic Spas® proprietary salt water system that produces sanitizer from Dead Sea salts through the process of electrolysis. Salt-water sanitizer generation has several advantages over traditional sanitizer methods. Firstly, sanitizer is created, rather than added to the system and so there is very little on-going cost related to this system. The resulting spa water is much more gentle to skin and eyes, and has a similar salinity to a human tear.

Onzen has many unique features that have overcome previous challenges tied to salt water systems for spas. The first is that Onzen has a user-replaceable electrode cartridge. Electrolysis is a sacrificial process - the electrodes will eventually deteriorate and require replacement. The replacement of the Onzen titanium electrode cartridge is a simple and inexpensive maintenance item that does not require the tub to be drained. The second key feature of Onzen is the ability to control the system either from the topside control, or via the Arctic Spas® smartphone App. This user adjustment can be used to match the sanitizer output of the Onzen system to the current, or anticipated bather load.

The use of the Onzen Salt Water system can significantly reduce the effort required to maintain clear and safe spa water, but we do suggest adding Peak I or II to maximize the benefit of the Onzen Salt Water system.

### ARCTIC PURE®

#### ARCTIC SPAS® EXCLUSIVE SPA CHEMICAL LINE

Arctic Spas® authorized dealers can provide a full line of Arctic Pure® chemicals for your spa. Using the approved Arctic Pure system ensures that your chemicals are economical, filler and additive - free and give greater consistency to your water maintenance program. Be sure to ask for Arctic Pure brand water treatment products to maximize the life of your hot tub.

# **UIGHTING** NORTHERN LIGHTS

Inspired by the Aurora Borealis of our northern winter skies, the Northern Lights system brings digital color changes and fades to your spa. With an extensive variety of patterns and sequences, you can choose the perfect lighting scheme for your mood... The system has two light locations that work together to fill your spa with color.

#### FAMILY LIGHTS

We are pleased to add another lighting package to the lengthy list of options available on your Arctic Spa. The Family Lighting Package features 2 underwater lights and uses elegant backlighting of the controls and drink holders along the top lip area of our spas. Additionally, "water-rope" waterfalls are also backlit. The numerous points of light in this package are digitally controlled, so the full range of lighting effects static, multi-color, fades and patterns light up your beautiful Arctic Spa as you choose. Pick your favourite colour(s), select a soothing glow or a lively pattern - whatever the mood requires, the Family Lighting Package can accommodate.

# ULTIMATE LED LIGHTS

Arctic Spa lighting taken to the next level! In the Ultimate Lighting package, all jets are backlit through clear sections with technology that neither affects water flow, nor creates a leak potential. All controls and cup holders are backlit as well, and we top things off with beautiful sconces that house down light LEDs that illuminate and attractively accent our beautiful cabinets. All light sources are digitally controlled, and offer the full range of fades, solids and intermittent patterns. Ultimate Lighting is a beautiful addition to any Arctic Spa...

# **SOUND SYSTEMS** ARCTIC SPAS® INTERGRATES COMFORT WITH TECHNOLOGY WITH OUR BLUETOOTH ENABLED

MUSIC STREAMING SYSTEMS.

All of your music can now stream from a Bluetooth-enabled device such as any Smartphone to your spa - your device can operate from the shelter of your home, or can be safely contained in a waterproof case so your favourites, your playlists and all your content is available within fingertips reach. If you wish to use other spa-side devices, the system can be configured with a wired connection as well - your older generation iPod, CD and TV audio all can be connected to these systems.

## WETTUNES<sup>TM</sup>

Our WetTunes stereo option gets a serious upgrade, as we have replaced our existing speakers with beautiful Poly Planar<sup>™</sup> airrise speakers. These speakers provide fantastic sound while providing great durability in adverse conditions. New as well, and mated to these speakers is a

powered subwoofer, delivering thumping low-end sound from within our  ${\tt FreeHeat}^{\circledast}$  cabinet.

## AQUATREMOR® Stereo system

The basis of the Aquatremor stereo system is the use of tactile transducers rather than speakers. These transducers are bonded to the shell and cabinet and drive sound through both solids and liquids with incredible clarity, effectively turning the spa shell, the cabinet and the spa water into the "speaker". As the human body is composed primarily of water, the sound waves pass through you as you relax in the water – so not only

are you hearing the music - it surrounds you, moves through you and you truly feel it! Every Arctic Spa mould design now has a signature Aquatremor® Seat, giving the music lover the most direct connection to the music possible. Also available with Aquatremor is our downloadable vibro-acoustic massage. These massaging audio tracks use very low frequency tones to massage different muscle groups. It's a therapy that needs to be experienced.

# AQUATREMOR® DELUXE

When you combine both our audio systems into one, you have created the best in spa sound available anywhere. The combination of high quality Poly Planar<sup>™</sup> speakers, amplification, as well as tactile transducers will surround spa users with unmatched, opulent sound quality.

### THE ARCTIC SPAS® EXCLUSIVE ACRYLIC LINE

Ponderosa Pine, Dakota and Kalahari from Aristech are unique in that they are textured surfaces. Not only do they hide minor scratches much better than smooth surfaces, but they do provide a little more traction - a nice peace of mind when children or those who aren' t moving so smoothly are considered. These three surfaces are exclusive to Arctic Spas<sup>®</sup>.

Kalahari

Dakota

#### Ponderosa Pine

### A SURFACE YOU CAN FEEL COMFORTABLE RESTING AGAINST.

Every Arctic spa is available in 9 beautiful shell colours (some textured), so you can choose the perfect match to your lifestyle and decor.

Odyssey

Ocean Wave

Mediterranean Sunset

Platinum Swirl

Espresso

#### THE POWER OF BIO-LOK<sup>™</sup> MICROBE SHIELD

In addition to Aristech Acrylics' excellent gloss and color retention, our Bio-Lok<sup>™</sup> surfaces are naturally impervious to microbes, without the need of added chemicals. The non-porous nature of Aristech's Bio-Lok sheet defends against the penetration and growth of microorganisms on its surface. Bio-Lok hot tubs are shielded against microbes, easy-to-clean, durable, and do not contain any anti-microbial chemicals, pesticides or similar additives.

## COVER COLOR CHOICE

CABINET OPTIONS

CLASSIC NO MAINTENANCE CABINETS

#### **Classic No Maintenance Cabinets**

Our redesigned Classic No Maintenance cabinet borrows from our tried and proven cedar cabinet - we have replicated this beautiful and functional design in 100% composite materials. Solid top and bottom rails and vertical surfaces are all HighWood composite material - highly resistant to the ravages of sun and weather, providing a true "no maintenance" exterior to your Arctic Spa.

# -- WATER FEATURES & HEATER TECHNOLOGY

### SKYFALL®

Our new SkyFall® Fogger generates and cascades an ethereal mist onto the water's surface of your Arctic Spa. Without the noise and splash of conventional water features, SkyFall® adds a dramatic, yet soothing aspect to your hot tub experience. The colour-changing SkyFall® LED backlighting accentuates the gentle motion of the mist, sequencing with your other lighting sources.

<u>;</u> TITANIUM<sup>тм</sup>

HEATER

NO QUESTIONS ASKED.

GUARANTEED FOR FIVE YEARS,

# THERAPY AIR

LIGHTER, BUBBLIER MASSAGE.

Air, like water, can be used for therapeutic massage. Arctic Spas® offers an available Therapy Air package on all spas\*. Therapy Air provides a gentler, bubblier massage than that of water jets. Unlike most other spas that draw cold air from the outside, Arctic Spas® Therapy Air System draws warm air from the heated air space under the spa providing a warm and comfortable massage.

Heaters fail more often than any other spa component. This is because most spa heaters use a heating element submersed into the water, directly exposing it to the potential hazard of chemical imbalance and poor quality water (a problem not usually covered under warranty). Arctic Spas® optional Titanium<sup>™</sup> heater uses the latest in heating technology to maximize efficiency and reliability for your peace of mind. The Titanium<sup>™</sup> heater has a titanium element that prevents the buildup of minerals, and is corrosion resistant to stand up to the harsh environment. On top of that, the no fault warranty covers the heater element for a full 5 years.

# START FEELING GREAT EVERYDAY, ANYTIME,

Arctic Spas may make product modifications and enhancements without notice. Specifications and dimensions are approximate and for reference only. Printed in Canada.
